Day 2: flight to Palana village, Tigilsky district, transportation to the hunting cabin

Day 3-9: 7 days of hunting

Day 10: return flight to Petropavlovsk, overnight in Petropavlovsk

Day 11: flight home

Details: Kamchatka peninsula has the largest population of big salmon eating bears and currently holds the world record. The average trophy size taken during the spring season is over 9 ft. square. Spring hunts take place when bears emerge from hibernation, with the snow is still present on the ground, which aids in locating best trophies. The daytime temperature range is from -10 C to +5C in the spring (+20F to +40F). Shooting distance is within 200 yards. Hunters should bring white camo suits, warm clothes, sun glasses and sleeping bags.
